1. Foundation of Java Programming

This course aims at two things: First initiating and non programmer to the world of programming using Java as a primary Language. As such No prior understanding or interaction with Java, or any Language for that matter is necessary. Secondly it takes you from there with the rest of beginners into the advanced world of programming and creation of software solutions.

If completed successfully, this course will give you solid foundation to continue with any specialized branch that you would like: Desktop applications with Swing, Web applications with Java EE or Mobile Applications with Android.

Course Package

46 Hours of live Interaction with Instructor	Access Recorded Classes for a Limited Period of Time	Certificate of Completion
--	--	---------------------------

Course Cost:

\$100 for Outside Tanzania	200,000 Tsh for anyone in Tanzania
----------------------------	------------------------------------

Course Instructor: Stefano D. Mtangoo **Running Time:** Week days from 15H00 – 17H00 EAT

Course Lessons:

Getting Started 25th October 2017	Introduction to Java Language 26 – 27 October 2017
